Who are we?

We offer NAIL accredited testing and repair services, distribute new products, and also manufacture products for the electrical industry. We support linemen, contractors, electricians, and other workers keeping the lights on around the country.

Foundation:

Herb Arnett founded the company in 1971. A veteran with extensive electrical knowledge, Herb Arnett saw an opportunity to improve the lineworkers lives by inventing durable, easy-to-use troubleshooting equipment.

Arnett's first products — the **Beast of Burden** and the **Pinpointer** Underground Cable Fault Locator — paved the way for many more product innovations that are now in use worldwide.

Recognizing the need for rubber personal protective equipment to be checked and tested frequently, Herb Arnett started a **dielectric test lab** under the name "Arnett Testing Labs", serving the electrical industry in the Pacific Northwest.

Today, over 50 years later, Arnett Industries remains on the forefront of technology, researching and developing new products and services, ever guided by our mission to provide our customers with service, safety, and savings.
