

FIELD TESTING

**HOT STICKS, GROUND CABLES, BOOM TRUCKS,
& BYPASS MECHANICAL JUMPERS (MACs)**

SAVE TIME, SAVE MONEY

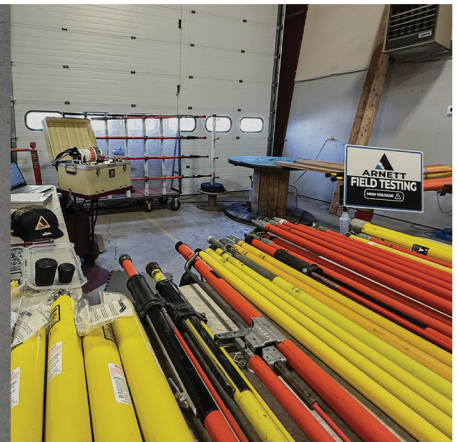

- ✓ *Hot sticks are tested at **75kV/foot** for **3 minutes***
**OSHA requires hot stick inspections be completed every 2 years.*
- ✓ *Our team is able to test **100-200 items/day***
- ✓ *HV testing requires an isolated indoor area with 110V AC outlet + tool access; empty truck bay is typically sufficient.*
- ✓ *We use certified **Hi-Pot Testing***

POST-FIELD TESTING

WHAT PASSED, WHAT FAILED & WHAT HAPPENS NEXT

All tools have been tested in accordance with applicable ASTM standards under our NAIL-accreditation — ensuring unmatched accuracy and safety

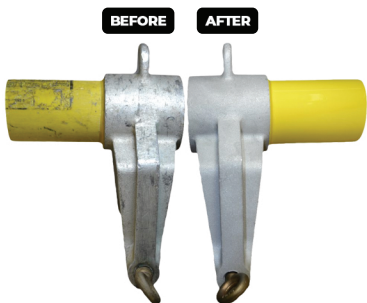

What happens to your tools that **PASSED?**

Upon passing the certification test, existing stickers are removed and unique ID certification labels with current date are applied for return to service.

What happens to your tools that **FAILED?**

They are evaluated for repair. If repairable, we can refurbish and re-test (cost is often half of what a brand new tool costs!). If not repairable, they are identified for replacement, with the option to purchase new from us. Tools are then shipped or delivered to customer based on pre-arranged agreement.

**Our skilled repair technicians will refurbish/refinish so they look and perform like new!*
