

# THE SPIKEBALL

**SUBSTATION ANIMAL DETERRENT/NEST PREVENTER**

**STOP NESTING BEFORE IT STARTS**

**✔ Protects Critical Equipment**

*\*Helps reduce wildlife-related outages*

*\*Effective solution in deterring birds from building nests near energized equipment*

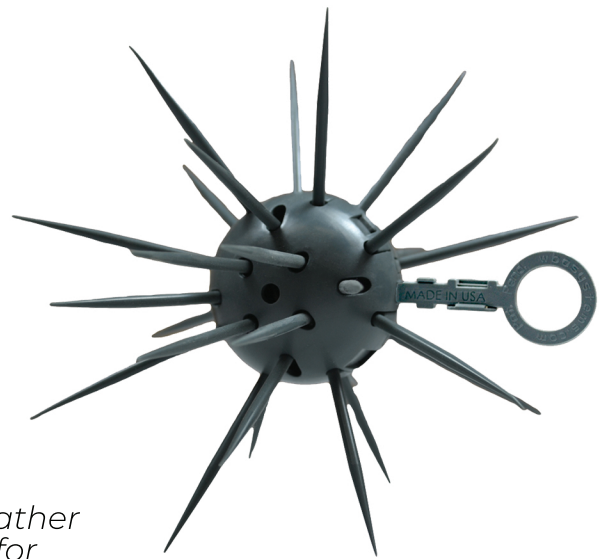

**✔ Easy Installation**

*\*Designed for live-line installation, allowing a technician to install from ground level using any grip-all stick*

**✔ Field Tested for the Outdoors**

*\*Proven performance in a wide range of weather conditions and backed with UV-protection for long-term durability*

*\*Field Tested, **Lineman Approved:** Developed by a utility Lineman from Blachly-Lane Cooperative, near Eugene, OR*

PART #: HJA-760

**SAFETY ★ SERVICE ★ SAVINGS**

**Arnett Industries**

*Built on a legacy of innovation and service as a trusted leader in accredited testing services and manufacturing of diagnostic testing equipment for 50+ years.*

# SPIKEBALL INSTALL

**⚡ NO DE-ENERGIZING REQUIRED ⚡**

**CAUTION:** Always wear approved PPE when working on or near energized conductors

SPIKEBALL SPECIFICATIONS	
Feature	Details
Material	UV-resistant molded polypropylene copolymer
Size	6" diameter
Weight	1.1 ounces
Color	Sky Gray
Warranty	One year parts and labor under normal use. Not responsible for misuse.

## STORY BEHIND THE PRODUCT

*Invented by a lineman from Blachly-Lane Cooperative, near Eugene, Oregon. This lineman's substation became a nesting spot for local birds, which in turn meant more maintenance (cleanup, etc.) for the substation workers. Tired of the birds returning to the substation over and over, he looked to develop a solution and invented the Spikeball, with the intention of preventing the birds from returning to their substation nests (see images above). It is not intended to remove existing nests, but to deter birds from building additional nests.*
